-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10, 14-17, 19, and 21-22, are rejected under 35 U.S.C. 102(e) as being anticipated by Saeki et al (6,078,727) as set forth in the previous Office Action mailed out on 10/13/05.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-13, 18, and 20, are rejected under 35 U.S.C. 103(a) as being unpatentable over Saeki et al in view of Moriyama et al (6,006,004) as stated in the last Office Action mailed out on 10/13/05.

### ***Response to Arguments***

6. Applicant's arguments filed 6/7/06 have been fully considered but they are not persuasive.

Applicant argues that the cited reference of Saeki et al fails to disclose the claimed feature of the index number of a first stream unit of each stream object to obtain the start position of the stream object. Applicant further indicates that Saeki et al only discloses a start time and end time of a video section of a VOB, i.e., a partial portion of VOB.

In response, it is noted that such a feature argued by Applicant is present in the cited reference of Saeki et al. Applicant's attention is directed to Saeki et al's claim 14, wherein the cited reference clearly refers to the start time as the beginning of the **first** video object unit corresponding to the video object. In other words the start time is the beginning of the video object as claimed since it is the beginning of the **first** video object unit of the video object as disclosed in Saeki et al.
